Chairman's Message

My Dear Esteemed Members,

Greetings of the Day,

Time has come when we are gearing up to meet again during PRAWAAS -4 being organised jointly by the fraternity of bus and car operators of Karnataka State. We are all set to welcome you all. I am incredibly grateful to all those who have joined hands for this mammoth task for the benefit of all the delegates assembling here which is one of the most beautiful cities of India.

Friends, this PRAWAAS is going to be different in many ways. For the first time many operators from north and northeast states will be participating in this Prawaas 0.4 and we will surely be enriched of their expertise and experiences. During all these years we continually worked for the betterment of our trades. We got success in many areas but still we need relief in other areas for which we are confident that with the collective wisdom and sustained efforts we will achieve it.

Friends the formation of BOCI was with a motive and mission to provide SAFE, SMART AND SUSTAINABLE PASSENGER MOBILITY to all the passengers travelling by road. We have started marching forward to achieve the desired goal. Now it is high time when we need to focus more vigorously to achieve these first tasks.

Friends every day we are encountering various new challenges to operate our services smoothly.

The first big challenge is to cope up with the fast changing new technologies to improve our trade.

The second challenge is to adapt to the changing 100 year old fossil fuel with electric power and other renewable sources of energy.

The next in the line is to have updated knowledge of fast changing regulatory provisions in the M. V. Act and Rules framed there under. Yet another challenge is to understand and meet the new expectations of our customers.

The answers to all these challenges you can find in our Prawaas 4.0 where various eminent personalities will deliberate on these challenges.

It is my humble request to you all to come to Bangalore on 29th to 31st and participate in all events to enrich your knowledge, see the exhibition to keep yourself updated regarding various products and develop friendship with fellow operators coming from across the country and gain first hand experiences. Enjoy the hospitality and the exuberant arrangements made by the host Bangalore and Karnataka team. I wish you all the best for this journey to carry lots of memories and experiences. I also wish you happy and safe journey back home.

Thank you so very much.

Your friend in BOCI

Jagdeo Singh

Chairman

Bus & Car Operators Confederation of India (BOCI)

President's Message

Dear Friends,

At BOCI, our mission has always been to empower members with the tools, knowledge, and resources needed to navigate the evolving landscape of passenger mobility. Through initiatives like Prawaas, we aim to create a robust platform where you can engage with the industry, witness latest technological advancements, explore new business opportunities, and collectively drive the sector forward. Our focus remains on ensuring that our members are well-equipped to meet the challenges and opportunities of the future.

On that note, it gives me great pleasure to welcome you for the 4th edition of Prawaas, a platform that has grown into a significant movement for the passenger mobility industry. As we gather in Bengaluru, a city synonymous with innovation, it is important to acknowledge that the world around us is evolving at a breakneck pace, and our industry is no exception.

Technological advancements are reshaping our operational landscape, pushing the boundaries of what we thought possible. Electro-mobility, once a promising concept, is now becoming a central pillar of our future. This shift is not just about adopting new technologies but also about rethinking and redefining our approaches to mobility. The pressure to address environmental challenges has never been greater, urging us to adopt sustainable practices and innovate in ways that minimize our ecological footprint. The regulatory environment is also evolving. New laws and regulations are redefining the operational boundaries within which we function, presenting both challenges and opportunities.

In this dynamic and often unpredictable environment, adaptability and forward-thinking are crucial. It is essential for us to embrace these changes, continuously innovate, and stay ahead of the curve to ensure we meet the future head-on.

Prawaas 4.0 is more than just an event; it is a significant movement dedicated to advancing the way we move people efficiently and sustainably. This year's edition will feature a grand exhibition that will showcase cutting-edge vehicles, products and solutions from leading OEMs, tech companies, financial institutions, etc. Our conference sessions, led by a distinguished panel of industry experts, will offer invaluable insights into the latest practices and emerging trends shaping the passenger mobility sector. These sessions are designed to provide you with practical knowledge and strategic perspectives that are crucial for navigating the current landscape and preparing for future developments.

I encourage each of you to take advantage of this opportunity to connect with your peers, engage with thought leaders, and explore new ideas that can help you grow your business. Prawaas is a unique opportunity to be at the forefront of the industry's evolution, and your active participation is essential to the success of this collective journey.

Let's join together in large numbers and make this movement- Prawaas, a resounding success!

With best regards,

Prasanna Patwardhan
President,
Bus & Car Operators Confederation of India (BOCI)

General Secretary's Message

Dear BOCI Stakeholders,

It is with great pleasure and honor that I extend a warm welcome to each one of you to Prawaas 4.0.

I would like to take a moment to acknowledge reflect on the combined efforts of our esteemed colleagues and myself, which have significantly contributed to the advancement of BOCI and Prawaas to its current standing.

The future of India's transportation sector is increasingly moving toward electric vehicles (EVs). I strongly urge all operators to prioritize the transition of their fleets to EVs, particularly in light of the rapid progress in infrastructure by the Central Government. Furthermore, it is essential to focus on unifying Corporates, MNCs, the manufacturing industry, and all other stakeholders.

Our collective efforts are pivotal in positioning BOCI as an independent passenger transport federation, capable of advocating for favorable policy decisions from MORTH and MHI. BOCI is actively collaborating with the Government to develop suitable financial, regulatory measures, and policy considerations to benefit the entire transport community.

I express my gratitude to the entire BOCI community for its steadfast support as we strive to achieve significant advancements for the passenger transport sector through BOCI. As stakeholders of BOCI, I am confident that we will continue to stand united in providing support to our fellow members. It is imperative for all country operators to set aside personal interests and stand as a cohesive BOCI family for the benefit of future generations. Our combined efforts will guarantee the best results for the community and address societal needs, thereby contributing to enhancing the safety of travel within our Country.

A. Afzal

General Secretary,

Bus & Car Operators Confederation of India (BOCI)

Treasurer's Message

Distinguished Members and Friends,

It is with immense pride and enthusiasm that I welcome you to Prawaas 4.0, a landmark event that has become the beating heart of India's public transportation sector. As a founding member and Treasurer of the Bus and Car Owners Confederation of India (BOCI), I have had the privilege of witnessing this platform grow into a vital festival for transporters, showcasing the very best of what our industry has to offer.

Prawaas has evolved into much more than a conference—it's a celebration of the dedication, innovation, and resilience of everyone involved in passenger transportation across India. This year's theme, "Towards Safe, Smart, and Sustainable Transport," reflects our collective commitment to advancing the industry while addressing the critical challenges we face today.

The event is a unique opportunity for every participant to immerse themselves in the latest technological advancements that are revolutionizing the way we move people. From cutting-edge autonomous vehicle diagnostic systems to electric and hydrogen vehicles that promise a cleaner and more efficient future, the innovations on display here are set to redefine our sector. These technologies are not just tools—they are the building blocks of a smarter, safer, and more sustainable transportation ecosystem.

As transporters, we are not just part of an industry; we are custodians of a vital public service that connects the nation. Prawaas 4.0 is our moment to come together, share our knowledge, and celebrate our collective achievements. I encourage each of you to engage deeply, learn from the experts, and take pride in being part of this incredible journey toward a brighter future for transportation in India.

Thank you for your unwavering support and dedication to BOCI and to the future of transportation in India. Together, let's continue to drive our industry forward, making it smarter, safer, and more sustainable for generations to come.

MULTI-MODAL & INTEGRATED TICKETING (OR MAAS) FOR PRIVATE BUS OPERATIONS

11.00 – 12.00
Hall 1

MaaS is in its nascent stages, with ongoing innovations and potential benefits yet to be fully realized. Given India's shift towards smart mobility, it is crucial to explore and identify the possibilities of integrating different modes while considering the associated promises and pitfalls. The discussion will focus on identifying implementation challenges under various segments like Governance, Data Management, User Adoption, etc.
